SUMMARY

Software Engineering student and Frontend Developer skilled in React.js, Next.js, and Firebase. Experienced in building real-world web applications — from HR management systems to production moderation dashboards. Currently interning as an AI Engineer & Web Developer, with a strong focus on clean, responsive, and user-friendly interfaces.

EXPERIENCE

AI Engineer & Web Developer — Intern

Jun 2026 – Present

[Viral Mobitech](#)

- Build and maintain real-world web applications with a primary focus on React.js
- Developed the HR Registry System and the MeetNew admin dashboard, both used in production
- Work with Firebase, modern web development workflows, and AI-assisted development tools

PROJECTS

HR Registry System [React](#) · [PHP](#) · [MySQL](#)

A live employee-management dashboard that tracks workforce status, automates EPF calculations, and generates retirement payouts — replacing error-prone Excel tracking.

MeetNew Admin Console [Vanilla JS](#) · [Firebase](#)

A moderation dashboard for a live video-chat app with 271K+ users — user reports, bans, and real-time presence, built with strict Firebase read-cost optimization.

Play Listing Checker [React](#) · [Client-side JS](#)

A browser tool that audits Google Play store listings in real time for policy compliance and ASO optimization, with all analysis running locally for privacy.
